

Android App UI with explanations

This document aims to describe the Siivouspäivä Android App UI and give all the needed information for coding (e.g., colorcodes, functionalities, typesizes,...).

I use

bold pink font for titles

regular pink font for descriptions

regular blue font for FUNCTIONALITIES

regular green font for FILENAMES

small green fonts for descriptions of typefaces, fonts,...

all the mentioned files can be found in our GitHub.

Fonts are in the fonts folder.

Icons are in Uldesign/android elements.

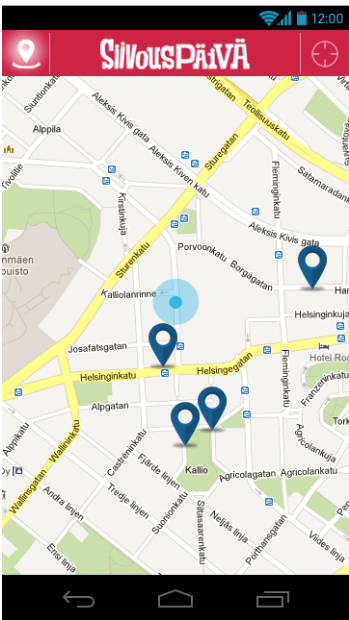

The UI sketches are in Uldesign/android UI.

the views

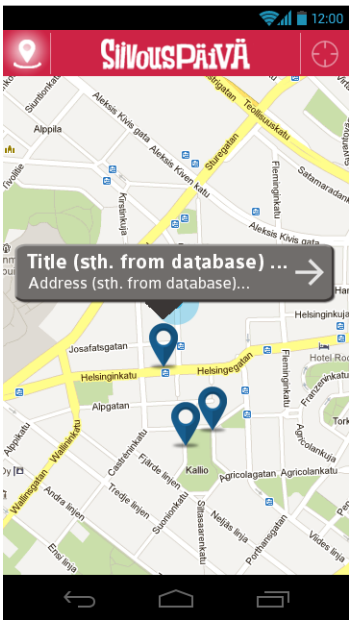

01_loading
view

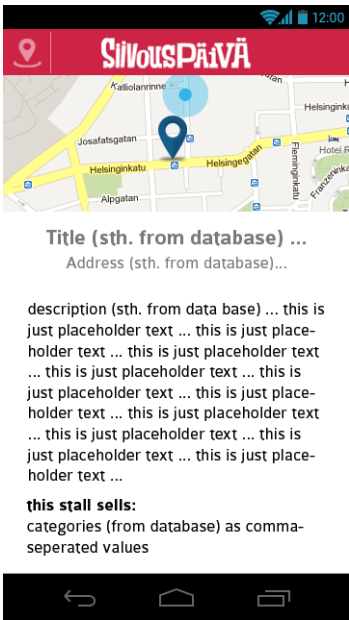

02_map view

03_map view
with popup

04_stall info

05_about

01_loading view

when? while the app is loading

01_loading view

when? while the app is loading

default Android top status bar
(always there)

image on whole
screen

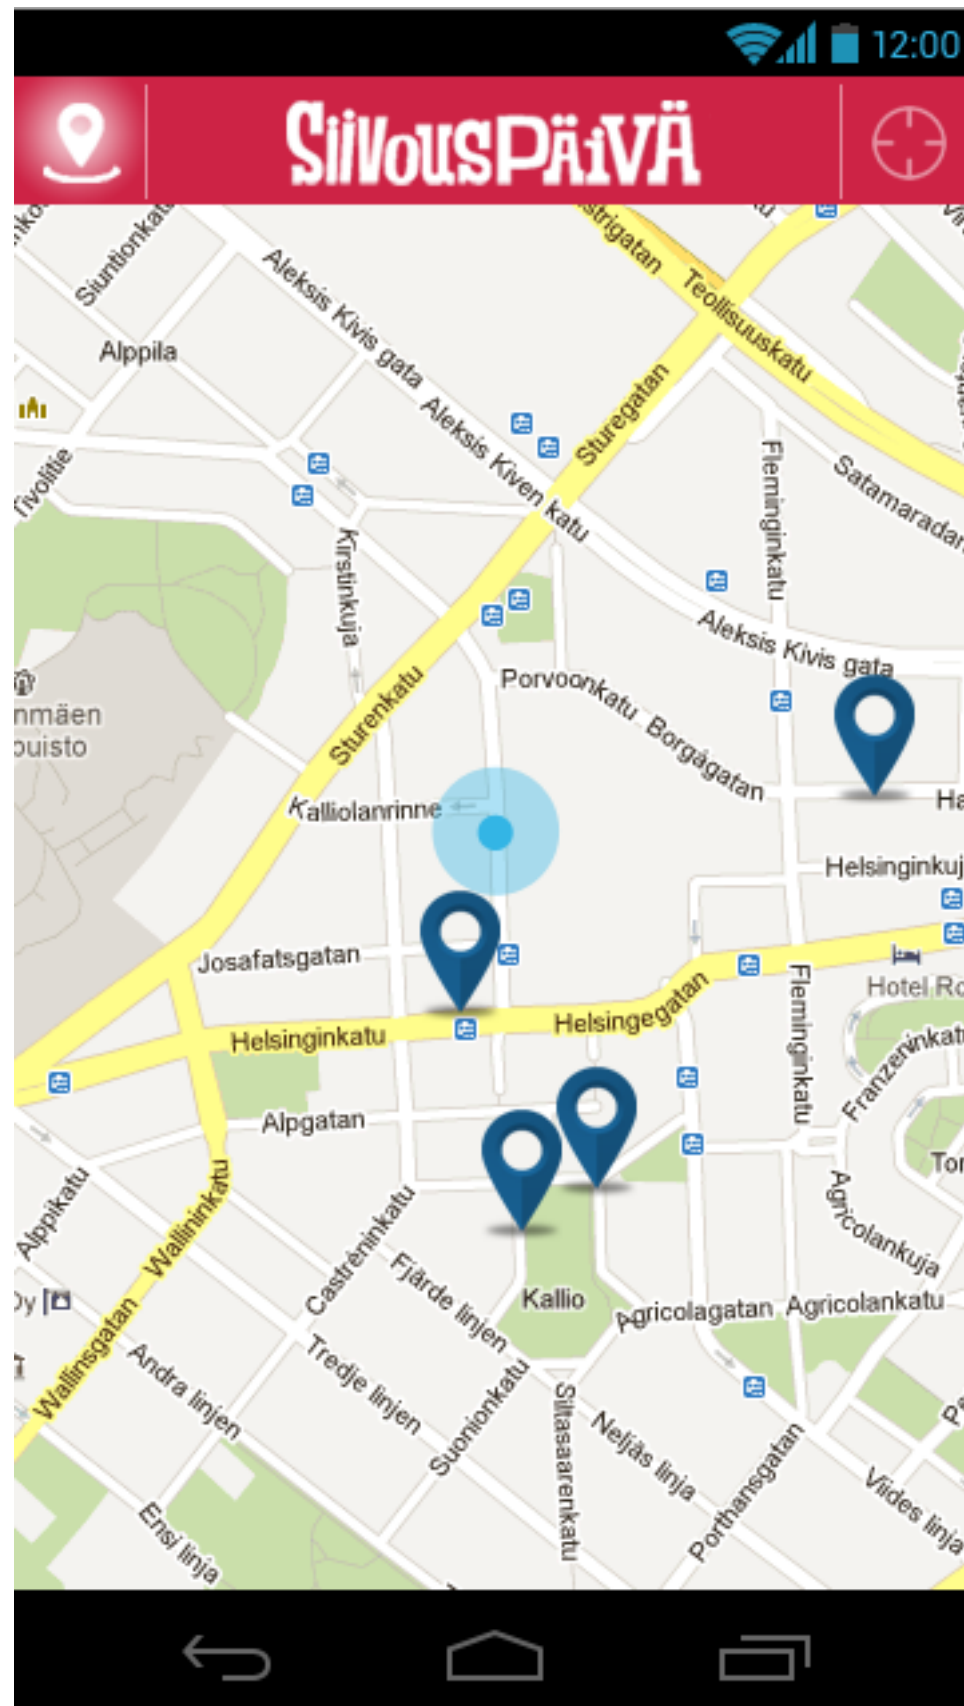

filename:

loading-image.png

02_map view

when? default view of application

02_map view

when? default view of application

background

color: pink

RGB: 205 - 35 - 69

height: 48px

logo in white

link to "About" page (still missing)

filename: siivouspaiva-logo-white.png

map button active
(indicates this is the
active view)

filename: missing

locate button

centers map to user's
current location

filename:

locate-white.png

user location

by default in center of
map

use default Android
marker (if available?)

stall marker

(indicates the stalls)

- markers retrieved
from database

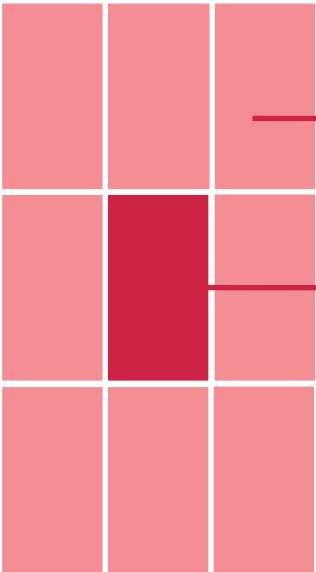

- on click popup
opens (see 03_map
view with popup)

filename:

map-marker.png

map

proposal from iOS
version: load map
and markers also for
area around current
view:

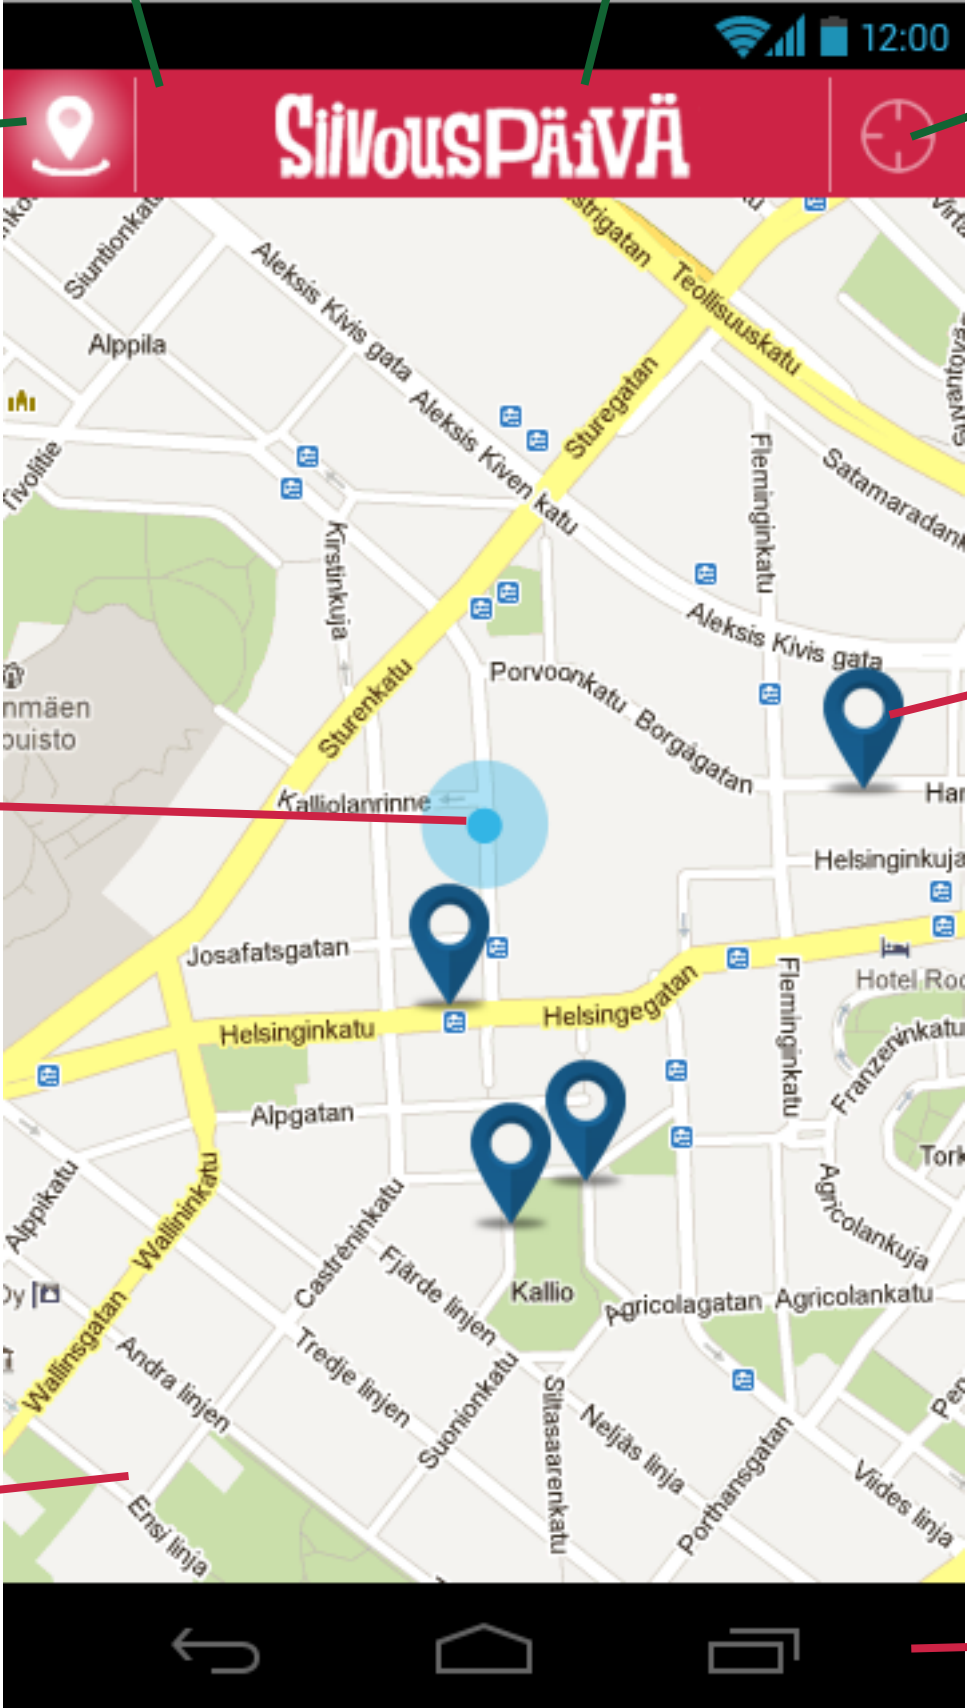

loaded area

current view

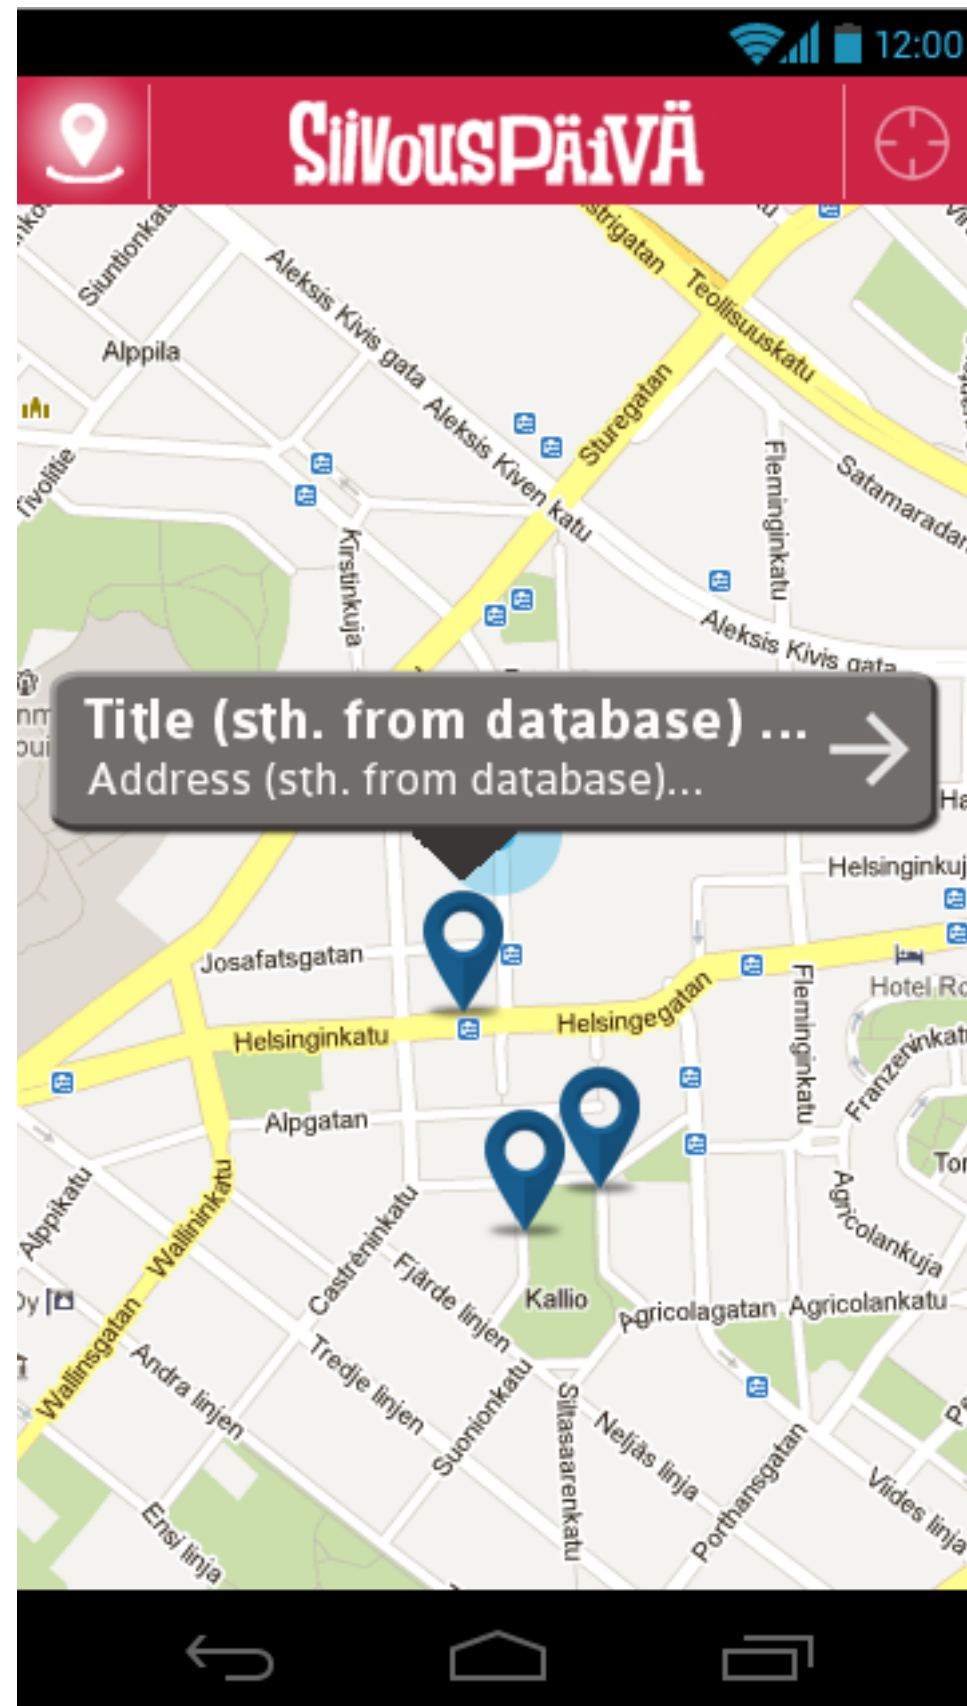

default Android
bottom bar

(should only be
visible on devices
that do not have the
buttons
[if possible?])

03_map view with popup

when? default view of application

03_map view with popup

when? default view of application

background

color: pink

RGB: 205 - 35 - 69

height: 48px

logo in white

link to "About" page

filename: siivouspaiva-logo-white.png

map button active

(indicates this is the active view)

filename: missing

locate button

centers map to user's current location

filename:

locate-white.png

displayed fields from database:

title:

font: Collaborate Bold.otf

size: 22pt

color: white (RGB: 255 - 255 - 255)

address:

font: Collaborate Regular.otf

size: 18pt

color: white (RGB: 255 - 255 - 255)

popup

shows essential info about stall

use default for

Android (can you

send a screenshot

please?)

next button

goes to 04_stall info (if possible also

whole popup could

link to the stall info)

filename:

navigation_forward.
